

Lesson on Character Webs

General Information	
Lesson Title: Character Webs	
Subject(s): Global Literature	
Grade/Level/Setting: 10 th /IB/Classroom	
Prerequisite Skills/Prior Knowledge: <i>What do your students already know or what do they need to know about the selected topic to successfully participate in the lesson?</i> Students should have an understanding of the concepts of shame and honor, fate and free will, masculinity, misogyny, tradition, repression, magic and storytelling.	
Standards and Objectives	
State/National Academic Standard(s): CCR.RL.3 – Analyze how complex characters (e.g., those with multiple or conflicting motivations) develop over the course of the text, interact with other characters, and advance the plot or develop the theme.	
Learning Objective(s): <i>Identify what students will accomplish by the end of the lesson; needs to align with the state or Common Core State Standards and needs to be measurable (condition, behavior, and criterion).</i> Given a character or underlying theme, students will be able to describe the role they play in advancing the plot by citing no less than two passages from the text, <i>Things Fall Apart</i>, with one focusing on their words, another focusing on their actions.	
Materials	Technology
<i>What materials will the teacher and the students need in order to complete the lesson?</i> • Multimedia – Slideshow Presentation • Handout – Web Activity • Exit Ticket	<i>How will you use technology to enhance teaching and learning? (Optional: Use the SAMR model to explain the technology integration strategies you plan to use.)</i> Substitution – Google slides as a direct substitution for note cards and a whiteboard
Language Demands	
<i>Specific ways that academic language (vocabulary, functions, discourse, syntax) is used by students to participate in learning tasks through reading, writing, listening, and/or speaking to demonstrate their understanding.</i>	
Language Function(s): <i>The content and language focus of the learning task represented by the active verbs within the learning outcomes. Common language functions include identifying main ideas and details; analyzing and interpreting characters or events; arguing a position or point of view; or predicting, recording, and evaluating data.</i> Students will <i>explain</i> the inferential meaning of proverbs from around the world, then justify their choice of proverb by concluding why it's withstood the test of time through multiple generations of people.	
Vocabulary: <i>Includes words and phrases that are used within disciplines including: (1) words and phrases with subject-specific meanings that differ from meanings used in everyday life (e.g., table); (2) general academic vocabulary used across</i>	

disciplines (e.g., compare, analyze, evaluate); and (3) subject-specific words defined for use in the discipline.

Motive, foil, protagonist, antagonist, conflict, cognitive dissonance, values, beliefs, gender roles

Discourse and/or Syntax:

Discourse includes the structures of written and oral language, as well as how members of the discipline talk, write, and participate in knowledge construction. Syntax refers to the set of conventions for organizing symbols, words, and phrases together into structures (e.g., sentences, graphs, tables).

Students will identify the major themes and primary roles played the characters in Chinua Achebe's *Things Fall Apart*, and discuss answer higher order thinking questions that analyze motives using details from the story.

Planned Language Supports:

The scaffolds, representations, and pedagogical strategies teachers intentionally provide to help learners understand and use the concepts of language they need to learn within disciplines.

I intend to provide a scaffolded example using a minor character in the story for students to use as a template when filling out their own character/thematic web.

Instructional Strategies and Learning Tasks

Anticipatory Set:	
Activity Description/Teacher	Student Actions
The teacher will check prior knowledge of proverbs	Students respond by sharing proverbs they grew up hearing or recalling from media they've consumed
Presentation Procedures for New Information and/or Modeling:	
Activity Description/Teacher	Student Actions
Teacher will present slide show in which they'll show a proverb, have the class guess the meaning, then reveal the meaning on the next slide.	Students respond to the slide show by guessing the meaning of the proverb as the slides progress before the meaning is revealed on the next slide
Guided Practice:	
Activity Description/Teacher	Student Actions
Teacher issues handout <i>Around the World in 50 Proverbs</i> , instructing students to select 3 proverbs for interpretation and principle analysis	Students read the "I Do" guided practice section of Step 2 on the microlab hand out
Independent Student Practice:	
Activity Description/Teacher	Student Actions
The Teacher moves about the room to assist students with question pertaining to the handout materials	Students move onto the "You Do" section of Step 2 on the handout identify three proverbs for analysis, identify the underlying principle, and write their interpretations
Culminating or Closing Procedure/Activity:	
Activity Description/Teacher	Student Actions
Teacher instructs students to form into groups of four, where they designate roles, keep time, share their findings, and present to the class.	Students form into groups of four and share their individually selected proverbs along with their interpretation and personal evaluation of its significance.

Differentiated Instruction

Consider how to accommodate for the needs of each type of student. Be sure that you provide content specific accommodations that help to meet a variety of learning needs.

Gifted and Talented:

Extend learning by challenging gifted and talented students to craft their own proverb to be passed on to the students that come behind them in the following year

EL:

Provide background knowledge on the meaning of specialized vocabulary
Visual supports

Students with Other Special Needs:

For students with special needs, provide them a list of proverbs with several interpretations included to scaffold understanding

Assessment

Formative

Describe how you will monitor, support, and extend student thinking.

Summative

(Quizzes, Tests, products)

Each group will have one presenter discuss in front of the class their groups chosen proverb, and the group will receive a score based on the presenters performance on the rubric.
